

Nifty 50s Activity

Middle Column – Trends and Designs

There are several options

Architectural drawings

- You may work alone or with one other person on this activity.
- Complete a series of sketches for the design of a family “fall-out shelter of the 1950s
- Your project should include the following sketches:
 - What it would look like from the outside?
 - What would the “floor plan” look like?
 - What would it look like inside stocked with provisions (at least one wall)?

Create a model/Diorama

- You may work alone of with one other person on this activity.
- Create a scale model of a “fall-out shelter” to be displayed in the 50s museum.
- Detail counts.

Build a “LIFE SIZE” FALLOUT SHELTER

- This may be done by a group of people (see Mr. Fortier about your group).
- This will be set up in the museum and people will be able to walk into it and sit...it should be a “sensory experience”.
- Only one of these will be allowed so you must prove/convince me that you are capable of getting it done accurately and on time.
- Have a plan and a record of task completion!
